**DAVIS SYSTEMS, INC. ANNOUNCES
NEW BASE OF OPERATIONS IN ELBERTON, GEORGIA**

Davis Systems, Inc. offers new, cutting-edge products that answer critical needs in the industry and world.

We are innovators and a manufacturer of new, patented, data center servers and related hardware and firmware. This includes, but is not limited to motherboards, power [sub] systems, power control boards, case enclosures and racking trays, racks, and other components necessary for data center operations. We also offer service and design for data centers, management, and equipment servicing and construction oversight. Thirdly, we have a role as a highly effective, research and development company, pursuing our other product versions and visions.

We are a Wyoming-based corporation and have been registered in Georgia as a foreign corporation. We look forward to our new base of operations being located in Elberton, Georgia, and to positively impacting the community here.
